PROFILE

I am a tech savvy person who is very enthusiastic about technology and has a lot of experience working with computers and providing tech support. I have a great array of skills and knowledge to tackle problems whenever they arise. This is possible as I have been on attachment at Rural Electrification and Renewable Energy cooperation in the ICT department. My dedication and smart working nature have helped me acquire good work ethics, autonomy and working under minimal supervision. I am proficient in Web Development (HTML, CSS, JavaScript, Python, Django), Linux and C programming.

WORKING EXPERIENCE

Attaché at Rural Electrification and Renewable Energy cooperation, Nairobi in the ICT department

June 2021 — September 2021

- I helped troubleshoot computer and networking problems that the organization staff encountered.
- Troubleshoot hardware issues.
- Configure software applications.
- Guide new attaches on problem solving and how to go about the daily support activities.

Software Reviewer at U-test, Framingham, Massachusetts (Worked Remotely)

February 2018 — November 2020

- I reviewed software applications by finding bugs and offering an amicable solution for them.
- I tested new software before being released for general public use.

Bug Bounty Hunter at Bug Crowd, San Francisco, CA (Worked Remotely)

June 2020 — January 2021

- Tested systems and software for vulnerabilities and bugs.

EDUCATION
